Free Anatomy Quiz - The Urinary System

The urinary system, also known as the renal system or urinary tract, consists of the kidneys, ureters, bladder, and the urethra.The purpose of the urinary system is to eliminate waste from the body, regulate blood volume and blood pressure, control levels of electrolytes and metabolites, and regulate blood pH. The urinary tract is the body's drainage system for the eventual removal of urine.

Urinary system - Wikipedia

The urinary tract is the body's drainage system for removing urine, which is made up of wastes and extra fluid. For normal urination to occur, all body parts in the urinary tract need to work together, and in the correct order. The urinary tract includes two kidneys, two ureters, a bladder, and a urethra.

The Urinary Tract & How It Works | NIDDK
