Coinage and the Roman Economy in the Antonine Period: the ...

Roman currency for most of Roman history consisted of gold, silver, bronze, orichalcum and copper coinage (see: Roman metallurgy). From its introduction to the Republic, during the third century BC, well into Imperial times, Roman currency saw many changes in form, denomination, and composition. A persistent feature was the inflationary debasement and replacement of coins over the centuries.

Coinage and the economy in the Roman and Early Chinese Empires. The Roman Empire was more monetized than the Qin-Han Dynasty, but even the latter was more monetized than most ancient agrarian economies. The Romans minted coins of gold, silver, and bronze. The Chinese Empire issued only bronze coins; gold and later silver were used as ingots.

Roman and Chinese coinage and economy

Beginning in the early Roman Empire, the economy, in the sense of using money to express prices and debts, and a basic banking system was formed. Emperors issued coinage stamped with their portraits to disseminate propaganda, to create public goodwill, and to symbolize their wealth and power.
