ETRTO Standards Manual

ISO 5775 is an international standard for labeling the size of bicycle tires and rims. The system used was originally developed by the European Tyre and Rim Technical Organisation. It is designed to make tire sizing consistent and clear. It replaces overlapping informal systems that ambiguously distinguished between sizes. For example, at least 6 different "26 inch" sizes exist, and "27 inch" wheels have a larger diameter than American "28 inch" wheels. The Japanese standard JIS D ...

ISO 5775 - Wikipedia

The European Tyre and Rim Technical Organisation (ETRTO) exists to specify and harmonise sizes of rims and their associated pneumatic tyre s across the European Union. ETRTO sizes apply to rims for vehicles of all types, including bicycles. The great advantage of ETRTO sizing is that it is unambiguous; previously, nominal dimensions were used which were interpreted in different ways by ...

European Tyre and Rim Technical Organisation

Nowadays, bicycle tires sizes should all fall in line with ETRTO's (European Tire and Rim Technical Organization) tire and rim standards. Yet the older English and French tire size markings are still used. An ETRTO size marked 37-622 indicates the width of 37 mm and the tire inner diameter of 622 mm.
