A junction box/7-way plug kit like Epicord # 277-000141 or # e99011 lets you convert the camper to match the 7-way RV blade type connector format. This avoids the extra connection points and potential trouble spots from using separate adapters. These items use different wire colors so be sure to follow the wiring guide for the specific kit you select.

Atwood & Happijac Systems in a Truck Camper

One of the more common problems that most electric guitar players will eventually come across is a dead signal. Sometimes it might be the pickup wiring, the guitar's circuitry or even something as simple as using a bad cable. And sometimes the problem can even stem from the output jack (sometimes wrongly referred to as an input jack), and if that's the case then you're in luck because ...

Replacing The Output Jack On An Electric Guitar ...

1- The GROUND wire for your battery and the GROUND wire from your tow connector should both be firmly connected to your camper's chassis, and the connections should not be rusty or loose. 2- the HOT wire for your running lights of your camper should be wired to the connections shown on a standard wiring chart for the specific type of connector ...
