This hydraulic residual check valve should be used in conjunction with the Lucas Girling type braking system. Installation of the RH01K hydraulic residual check valve will typically prevent this leakage therefore extending the life cycle of these brake assemblies. This valve maintains a small amount of residual pressure

I just purchased a 1989 f600 rollback truck that had been sitting for four years. This truck has Lucas Girling brakes and the parking brake chamber is run with power steering fluid. My problem is the passenger side brake chamber will periodically spew power steering fluid and then will act normal with no leaks.
