National Geographic

In fact, this is the same for many other places around the world. Most people seem to have experienced weather that was hotter, wetter, drier or wilder than normal. This article, based on an article by Peter Miller from the September 2013 issue of National Geographic Magazine, looks at what is happening to our weather.

| Scholastic

The average weather in a specific region, as well as its variations and extremes over many years, is called climate. For example, the city of Las Vegas in the U.S. state of Nevada is generally dry and hot. Honolulu, the capital of the U.S. state of Hawaii, is also hot, but much more humid and rainy. Climate changes, just like weather.
