EXCITATION, the NETWORK, and the RESPONSE. Network analysis is concerned with determining the response, given the excitation and the network. In network synthesis, the problem is to design the network given the excitation and the desired response.

The function of Network Analysis is to find voltages and currents through the components present in a network. This book is in many senses a tour de force of network analysis and synthesis. It covers most of the essential topics to understand the workings of modern networking and lays the foundation for more advanced studies
